

This Altay ibex was taken from the Western Sayan Mountains of Russia by Karoly Molitorisz (Hungary), October 2015. Karoly was hunting with ProfiHunt.

Species: *Altay ibex*

Date taken: *October 24, 2015*

Location: *Western Sayan Mountains, Russia*

Outfitter: *ProfiHunt – Vladimir Melnikov*

Highlights: *We traveled by car from Abakan, and then for four hours by motorboat on the Yenisei River. We climbed from 500 meters to 1300 meters in fresh snow. On the mountain, the weather was cloudy with minus 5°C. Because of the foggy weather, the ibex could not see us and I shot a 14-year-old ibex. The house at base camp was very comfortable with a sauna. The organizer and guides were perfect. The main organizers were Hungarian Ltd., Vadaszutak Kft., and ProfiHunt.*
