

### Musk-Ox in West Greenland 2019

Western Greenland is home of 4,000 to 5,000 musk oxen. Due to the special conditions of vegetation, the forage base in this region is very abundant and musk oxen is bigger in size on average is 15% larger than in other areas of the island. The musk oxen bull can grow to a total weight of 350 kg. Taking a musk ox in this area will give you the chance of bringing home a trophy which could well be among one of the biggest in the world. During the hunting tour there will be a radio link to Kangerlussuaq. Security for the participants will be kept at its maximum in case of emergency. When the oxen have been taken, the trophies will be prepared and packed for the return trip. If time allows we will go for a hike to the magnificent Ice cap. The Ice cap has a volume of approx. 2.000.000 km<sup>3</sup> ice, which is the same as 9% of the world total reserve of drinking water. If you as a hunter wish too, you can bring back home a slice of meat for tasting (1kg. sliced meat without bone from the back leg). Some of the meat from the musk oxen and caribou we use for cooking in the camp and the rest of the meat will be shared between the guides.

**Free spots :**

- 13.08 - 16.08 - 1 spot.
