

Siarhei Puzankevich (Belarus, center) hunted with ProfiHunt in November 2018 to get this Yakutia snow sheep.

Yakutia Snow Sheep (11/2018): I took my Yakutia snow sheep on the first day while hunting with **ProfiHunt [Diamond Supporter]**. Due to cloud cover and gusts of wind, the first shot hit the ram a little far back from a distance of 278 meters. With a follow up shot from 368 meters, I got my ram. I was very lucky to get him in the bad weather. The temperatures dropped to minus 38°C during the hunt.
